

REMARKS

Claims 16, 25, 36, and 39 have been cancelled. Claims 1, 12, 13, 20, 21, 29, 34, 40, 43, 44, and 45 have been amended to define the invention with more clarity. New Claims 55-63 have been added. Applicant submits that all amendments are supported by the application-as-filed and that no new matter has been added. Claims 1-15, 17-24, 26-35, 37-38, and 40-63 are now in the application. Consideration of the application is requested in light of the foregoing amendments and following remarks.

The amendment to the specification merely states explicitly some of the "any elevations" (page 19 line 28 of the specification as filed) where the pressure source and/or diverter, illustrated in the drawings, can be located. Accordingly, Applicant submits that no new matter has been added.

New dependent Claims 55-61 have been added in order to more specifically claim the invention. New independent Claims 62 and 63 are derived from allowed Claims 21 and 30, respectively.

The accompanying RCE has been filed, along with a Supplemental IDS, in order to have the examiner consider new references received with the PCT search report. All claims are believed to be allowable over all references now of record. Accordingly, Applicant respectfully solicits allowance of all claims now in the application.

In addition to the RCE fee, a further fee in the amount of \$325 is believed to be due to pay the claims fee for the newly-added claims. Separate checks are enclosed herewith to pay both the RCE fee and the claims fee. Should any other fee be properly due, or if any refund is due, kindly charge same, or credit any overpayment, to Deposit Account 23-2130.

Please feel free to contact me with any questions, comments or concerns, at the telephone number listed below.

Respectfully submitted,  
Brian Gridley
